

8" - KEVLAR CONE DRIVER - 210 mm

CLASSIC SERIES

Black woven kevlar cone
High loss rubber suspension
Large magnet (550 g)
Low resonance (28 Hz)
High temperature voice coil
Stamped steel chassis

Cône kevlar noir
Suspension caoutchouc
Ferrite largement dimensionnée (100 mm)
Fréquence de résonance basse (28 Hz)
Bobine haute température
Châssis acier embouti

Ideally suited for high 2 or 3-way, this 8" bass midrange features a black woven kevlar cone coupled to a high loss rubber suspension. A large magnet, high temperature voice coil and low free air resonance contribute to the clarity, transient response and excellent musical tonality produced by this driver. The "Suggested applications" charts indicate various driver loads, included the box alignment used to measure the response curve (Vb REF). The response curves shown on the diagram indicate the predicted low end response of the driver in the suggested box volume (Vb) with suggested port (Dp-Lp).

Ce haut-parleur de 210 mm, utilisable en boomer-médium est équipé d'un cône en kevlar noir et d'une suspension caoutchouc. Son système magnétique largement dimensionné, sa fréquence de résonance basse et l'extrême résistance de son cône lui confèrent les qualités musicales - dynamique, haute définition, clarté - pour l'utilisation en enceintes haut de gamme. Le tableau "Suggested applications" indique différents types de charge dont celui utilisé pour la mesure de la courbe de réponse (Vb REF). Les courbes publiées correspondent à la réponse dans le grave pour un volume (Vb) et une dimension d'évent donnée (Vp-Lp).
